- Node JS
- Express JS
- C#

### Database

- MySQL / Maria DB
- MySQL Server
- Data migration (Excel  
to MySQL)

### Tools

- Git Hub
- Jira
- BitBucket

### Deployments

- Shared Hosting (Front  
end + Back end)
- IIS Server
- Vercel ( Front end )

## PROFESSIONAL EXPERIENCE

**Pharma Lord PVT LTD - Layyah | Software Engineer**

**Mar 2021 - Present**

**PHARMEX HMS**

<https://lordstech.lthms.com/>

- The Hospital Management Software is a comprehensive software solution designed to cater to the needs of hospitals and healthcare organizations. The software covers three key areas of hospital management, including Pharmacy Management, OPD Management, and IPD Management.
- Overall, the Hospital Management Software is an essential tool for healthcare organizations looking to improve their efficiency and provide better patient care.

**Role:**

- Full Stack Developer

**Main Modules:**

- Pharmacy
- OPD
- IPD

**Tools & Technologies:**

- React JS
- MUI
- Redux
- Node JS
- Express JS
- Maria DB

**PHARMEX DMS**

<https://distribution.lthms.com/>

- Spearheaded the development and implementation of a comprehensive Distribution Management System (DMS) software solution,
- Encompassing Inventory Management, Sales Management, Purchase Management, Delivery Management, Order Booking, Mobile App
- Integration, Payment and Receipts Management, Company Schemes Processing, Product Management, Company Group Management, with more than 50 Reports.
- Optimized business operations by providing real-time visibility and workflow optimization, resulting in cost reduction and improved productivity.
- Elevated customer satisfaction by enhancing delivery management and order processing, leading to faster turnaround times and increased accuracy.

**Role:**

- Full Stack Developer

**Main Modules:**

- Purchase
- Sale
- Payment
- Receipts
- Order Booking
- Delivery
- Scheme
- Claims
- Reports

**Tools & Technologies:**

- React JS
- MUI
- Redux
- Node JS
- Express JS
- MySQL

## PHARMEX DMS ORDER BOOKING **MOBILE APP**

- Pharmex DMS Web Application integrated with **mobile application** so its reduce work of creating sale invoice because order booker book order from mobile app then orders automatically appear on web application then sale invoice created only in single click
- This mobile application work online and offline with the help of SQLite. While User have internet he simply sync data from server then he will be able to work offline, and if he want to push data on server when he have active internet then user also sync data to server

### Role:

- Full Stack Developer

### Main Modules:

- Order Booking

### Tools & Technologies:

- React Native Expo
- MUI
- Redux
- Node JS
- Express JS
- MySQL

## DOCTORS HUB | **(WORK CONTINUED SINCE 2022)**

- **Patients Module:** This module allows patients to create profiles, search for doctors by specialty, view available appointment times, schedule and manage appointments, and access their medical records.
- **Doctors Module:** This module allows doctors to create profiles, manage their schedules, view patient information and medical histories, communicate with patients through secure messaging, and conduct virtual appointments through telemedicine.
- **Pharmacy Module:** This module allows pharmacies to manage medication inventories, receive electronic prescriptions from doctors, and process patient orders.

### Role:

- Front End Developer

### Main Modules:

- Doctors
- Patient
- Pharmacy
- Lab
- Admin Portal

## PHARMA LORD WEBSITE

<https://pharma-lord.com/>

- Pharma Lord is a medicine manufacturing company, then I create a website for pharma lord in which users can see pharma lord information as well as products

### Role:

- Front End Developer

### Tools & Technologies:

- React JS + Vite JS

## Voice Assistant News App WEBSITE | Alan AI

- Basically it's a News Application integrated with Alan AI. Alan Ai is revolutionary speech recognition software that allows you to add voice capabilities to your application. In this application user can interact with voice and Alan respond user question. I only attach news API so only news question will be answered by Alan

### Role:

- Front End Developer

### Tools & Technologies:

- React JS
- Alan AI
- MUI

## Vision Plus – Lahore | Software Engineer

Sep 2020- Feb 2021

- As a software maintenance developer, I have been working extensively with .NET technology and SQL Server. My responsibilities include maintaining and updating existing codebase, debugging software issues, and providing technical support to end-users.
- I am proficient in using .NET Framework, C#, and SQL Server. Additionally, I have experience in collaborating with cross-functional teams, including software developers, testers, and business analysts. I am passionate about providing exceptional customer service and thrive in fast-paced environments.

### Role:

- Junior Dot Net Developer

### Tools & Technologies:

- C#
- MS SQL SERVER
